

KANTAPON THANWISETWONG

SOFTWARE DEVELOPER | AI & INTERACTIVE TECHNOLOGY

CONTACT

063 642 3892
kthanwisesvong06364@gmail.com
Bangkok, Thailand

EDUCATION

B.Sc. Media Technology
King Mongkut's University of Technology Thonburi
Current student

CORE SKILLS

Programming
Python, JavaScript, C#, C++, SQL

Interactive
Unity, VR, AR, Roblox Studio

AI / Vision
MediaPipe, YOLO, OpenCV

Embedded
ESP32, Arduino, Raspberry Pi

Design
UX flows, Game UX, Onshape

PROFILE

Media Technology student building practical digital experiences across web development, computer vision, VR, AR, robotics, games, and sensor-driven systems.

SELECTED PROJECTS

Badminton Pose Analysis — 2026

Web application that transforms video and webcam pose data into understandable badminton-stroke feedback.

Python | MediaPipe | ML | HTML/CSS/JS

V-ResQ — 2026

VR rescue-robot control prototype integrating real-time input, sensor feedback, distributed control, and safety planning.

Unity | Meta Quest 3 | Raspberry Pi | ESP32

Smart Rehab Leg & Arm — 2025-2026

Gamified rehabilitation prototype mapping force and range-of-motion sensor data to real-time visual feedback.

Unity | C# | Load Cell | Gyroscope

Fashion E-commerce Website — 2025

End-to-end shopping flow covering product discovery, cart, checkout, accounts, profile, and seller tasks.

HTML | CSS | JavaScript | Node.js | MySQL

Seizure Mission - Roblox — 2026

School-based educational game using missions, NPCs, and in-game UI to communicate seizure-response knowledge.

Roblox Studio | Lua/Luau | Game UX

3D Product Modeling — 2025

Parametric product-form studies using sketches, lofts, extrusions, transformations, and assembly workflows.

Onshape | 3D CAD | Product Design

ADDITIONAL PROJECTS

VR Hospital Simulation | CountBall | BATHUB WHALE AR | AI Human Detection | ArUco Tracking | Nine Hall Sensor System

Portfolio links, study dates, and individual group-project responsibilities are available for confirmation.
